PUI Assignment 6A write-up

Prototypes of new Shopping Cart page

Figma Link:
https://www.figma.com/file/RJB6hG7LLfNfjbuw8fiYFk/PUI-Sunniva-Liu?node-id=44%3A2074

How mockup changed:
1. The Shopping Cart page
   The Home page has been modified to include more detailed Covid Testing and Vaccination information (location and time and type of appointment is listed out). The My Vaccination page and My Tartan Testing page can also display the existing appointment, and their design is basically the same as Figma prototype.
2. The Detail page
   The design of two confirmation page for both Covid Testing and Vaccination is basically the same, as the location and time is displayed clearly on that page to show a specific appointment has been made.
3. The List page
   The list of all available appointments for both Covid Testing and Vaccination is basically the same, but looking aesthetically better in the mockup than in Figma. As the user select one appointment slot and click confirm, the appointment information will be updated to the system and can be shown in Home page, My Vaccination page and My Tartan Testing page accordingly. At the same time, if the user did not select any checkbox or selected more than one, an alert will appear.
